

Gianluca Tranchedone

Senior Software Engineer specialised in developing applications for Apple devices and full stack Ruby on Rails development.

WORK EXPERIENCE

September 2014 - Present

Shopa Ltd, London - UK

Contract Senior Software Engineer / Lead Mobile Developer

Shopa is one of the first Social Marketplaces, connecting retailers with customers through the power of social recommendation. At Shopa I've...

- Helped management come up with a focused long term vision for both mobile app and website.
- Helped define the back-end system architecture and helped building a server-side REST API with Rails.
- Built a couple of mobile app prototypes based on business goals and final version of the mobile app using TDD / BDD and other techniques.

October 2013 - September 2014

Lowdownapp Ltd, London - UK

Contract Senior Software Engineer / Lead Mobile Developer

Lowdownapp is a small startup focusing on making busy professional's life easier. In fact, their main app, Lowdown, is the fastest way to get meeting information. At Lowdownapp I've...

- Advised the founders on technologies and helped them planning their mobile strategy based on the vision they have for their product.
- Developed the apps Lowdown and HERE and a range of contained private libraries that can be easily integrated in all projects via CocoaPods that were used in the development of the two apps.
- Helped the CTO and backend developer defining a set of APIs.

August 2013 - October 2013

Reply Ltd, London - UK

Contract Senior iOS Software Engineer

Reply is a leading Consulting, Systems Integration and Digital Services company. At Reply I've...

- Helped their in-house team meet a deadline with their customer (large European retailer) by quickly building a large portion of the mobile app they had to deliver.
- Tutored their in-house team on technologies and methodologies to adopt, such as Core Data (data modelling and data persistence framework for iOS and Mac), Software Design Patterns and Automated Testing (TDD)

April 2013 - August 2013

Tictrac Ltd, London - UK

Contract Senior iOS Software Engineer

Tictrac is a small startup that aims at letting you discover more about yourself, by showing you all of your activities in one place. At Tictrac I've...

- Developed an iOS SDK for third-parties interested in integrating the data and machine learning capabilities of the service into their own apps.
- Developed a prototype for the company's second-generation iOS app, related to the B2C offering of the company.

October 2012 - March 2013

doo GmbH, Bonn - Germany

Senior iOS / OS X Developer

doo is a small startup that aimed at letting you get all your life's documents organised into one place by syncing with all cloud services you use and categorising them. doo is no longer supporting this business but focusing instead on the app Scanbot, only recently developed. At doo I've...

- Helped the in-house team develop their Mac app, later featured by Apple as "App of the Week" on the Mac App Store.
- Started working on their iOS app, later featured by "Apple as App of the Week" on the App Store.

June 2011 - October 2012

Service2Media Ltd, Enschede - The Netherlands

iOS Developer

Service2Media is an international Consulting and Digital Services company. At Service2Media I've worked with TV Channels Broadcasting and Banking clients of the company. More details about the experience at Service2Media can be provided upon request.
